SR-3015

*Our NEW CNC Sheet Router
for a Wide Range of
Industries*

Haas SR Series sheet routers are affordable alternatives to gantry-style milling machines for cutting lighter materials, such as wood, plastics, high-density foam, and composites. The large travels of these machines easily accommodate full sheets of material, long extrusions, or multiple setups of smaller parts.

Powered by the industry-leading Haas control, SR Series routers provide a level of programmability and functionality not found in other CNC routers.

DUST COLLECTION SYSTEM & USER-FRIENDLY HAAS CONTROL INTERFACE

SR SERIES SHEET ROUTERS are equipped with the same powerful, easy-to-use Haas control found on every machine we build, and they come standard with a built-in vacuum dust collection system to remove chips, swarf, and dust produced during machining, keeping your shop cleaner, and reducing exposure to airborne dust.

STARTING PRICE:
\$44,995!

FEATURES & BENEFITS

- **18,000-rpm ER32 Integral Motor Spindle, 4.5 kW:** Accommodates tools up to 0.75" in diameter, ensuring precision and versatility.
- **Large Capacity:** 59" x 118" x 7.9" (xyz) Travels
Easily accommodates full sheets of material, long extrusions, or multiple setups of smaller parts.
- **Built-in Dust Removal System:** Keeps your workspace clean and efficient.
- **User-Friendly Haas Control Interface:** Intuitive controls and robust features make programming and adjustments simple—even for beginners.
